Overview of the ECE Graduate Programs
Monique Wimberly
Dept. of Electrical and Computer Engineering, UTSA

Friday, October 30, 2015, 2:00pm – 2:50pm, Location: BB 3.01.06

Abstract
Do you find yourself wondering: “What is a Program of Study? Which Graduate Catalog do I follow? When can I apply for Reduced Course Load?” This talk will focus on the administrative details of your academic journey that sometimes get lost in the mix after research, final exams, and publications. I’ll be able to answer general questions about degree progress, administrative forms or processes, and provide a general outline of how to successfully navigate the administrative side of the academic journey.

Bio
As the Graduate Programs Coordinator in the Electrical & Computer Engineering Department, Monique Wimberly provides administrative support to the M.S. & Ph.D. programs by processing paperwork, managing registration, and serving as the link between students & the Graduate Advisor of Record. She has a B.S. in Sociology from The Ohio State University and is currently a second year law student at St. Mary’s University.
